

Letter of Recommendation: Hector Herrera

Date: April 20, 2026

To Whom It May Concern,

It is my distinct pleasure to recommend **Hector Herrera** for a position as a Front-End Developer. Over the course of his five-year tenure at ReservHotel and Tambourine, Hector has proven himself to be a remarkably disciplined and detail-oriented developer, evolving into a specialist who truly understands the marriage of form and function.

Hector's most significant impact came during his work on our **Booking Engine**. This was a high-stakes project that required a delicate balance of complex logic and seamless user experience. Hector took the lead on both the maintenance and the eventual revamping of the engine, where he demonstrated:

- **Pixel-Perfect Execution:** Hector has an incredible eye for detail. He ensured that every interface was implemented with absolute precision, maintaining design integrity across all devices and browsers.
- **Performance Optimization:** Beyond aesthetics, he focused heavily on optimization, ensuring the booking process was fast, responsive, and free of friction—directly contributing to our platform's reliability.
- **Independent Initiative:** One of Hector's greatest strengths is his ability to work autonomously. We reached a point where we could provide high-level requirements and trust him to execute the task independently, knowing the result would be high-quality and thoroughly tested.

In an industry where "Junior" roles are often transient, Hector's five-year commitment is a testament to his loyalty and his constant desire to grow. He transitioned from someone learning our systems to a core contributor who could be trusted with our most vital revenue-generating tools.

Hector is a rare talent who possesses both the technical chops of a developer and the refined eye of a designer. He will be a significant asset to any team lucky enough to have him. Please feel free to contact me for any further details regarding his work.

Sincerely,

Diego Perez | Senior Software Engineer | Tambourine
